CLIENT PROFILE

SKY POWERSPORTS

Florida's choice for top powersports brands and high quality service.

As one of the premier powersports dealers in Florida, Sky Powersports is well known for its unmatched selection and commitment to providing excellent customer service.

Their impressive 30,000 square foot facility in Sanford, Florida is home to a large inventory of top tier powersports brands ranging from BMW and Ducati motorcycles to Specialized E-Bikes.

We recently worked with Sky Powersports on a large scale project that included the installation of a Cogan mezzanine and custom AGF Brome workstations for their high performance service center.

The Cogan mezzanine at Sky Powersports blends seamlessly with its surroundings.

Project Stats

COGAN MEZZANINE

CAPACITY / SQFT.
125LBS

This Cogan mezzanine can support 125,000 pounds when properly distributed. For perspective, that's equivalent to about 30 average cars.

SQUARE FEET
1,000

Previously unused vertical space turned into flexible storage without expanding the building's footprint.

DIMENSIONS
53^x30

Sky Powersport's mezzanine spans an impressive 53 feet, which is the same length as a standard semi trailer truck.

TIME TO INSTALL
10 DAYS

Mezzanines are an incredibly fast and flexible storage solution. Most installations take two weeks or less from time of delivery.

PROJECT HIGHLIGHTS

BMW Showroom at Sky Powersports

DEFINING THE CHALLENGE

As a rapidly growing company, the team at Sky Powersports reached out to us for guidance on how best to gain additional floor space at their existing facility, without disrupting their day to day operations.

In addition, they were seeking a solution that would allow their team of talented mechanics to complete their work as efficiently as possible.

DEVELOPING SOLUTIONS

Prior to initiating the project, our team began with an in-depth analysis of the client's needs and expectations.

With the goal of developing a reliable and cost effective solution that could be implemented quickly, it was clear that a high quality Cogan brand mezzanine was the answer to their floor space issues.

Not only would it allow the client to instantly double their floor space without impacting ground level operations, but it's modular design means it can be easily modified and expanded as the company continues to grow and evolve.

In addition to creating more floorspace, the team at Sky Powersports also needed dual function work areas that would give their mechanics a stable surface to perform repairs and a way to store their tools and supplies.

In this instance, we recommended durable AGF Brome workstations that consist of customizable storage space integrated with durable countertops.

DELIVERING RESULTS

MEZZANINE

With the plan in place, work commenced and the project was delivered at top speed. We were able to install the mezzanine within just 10 days of delivery. Spanning an impressive 53x30ft, it added over 1,000 square feet of additional storage space to the facility without impacting the spaces below.

DELIVERING RESULTS

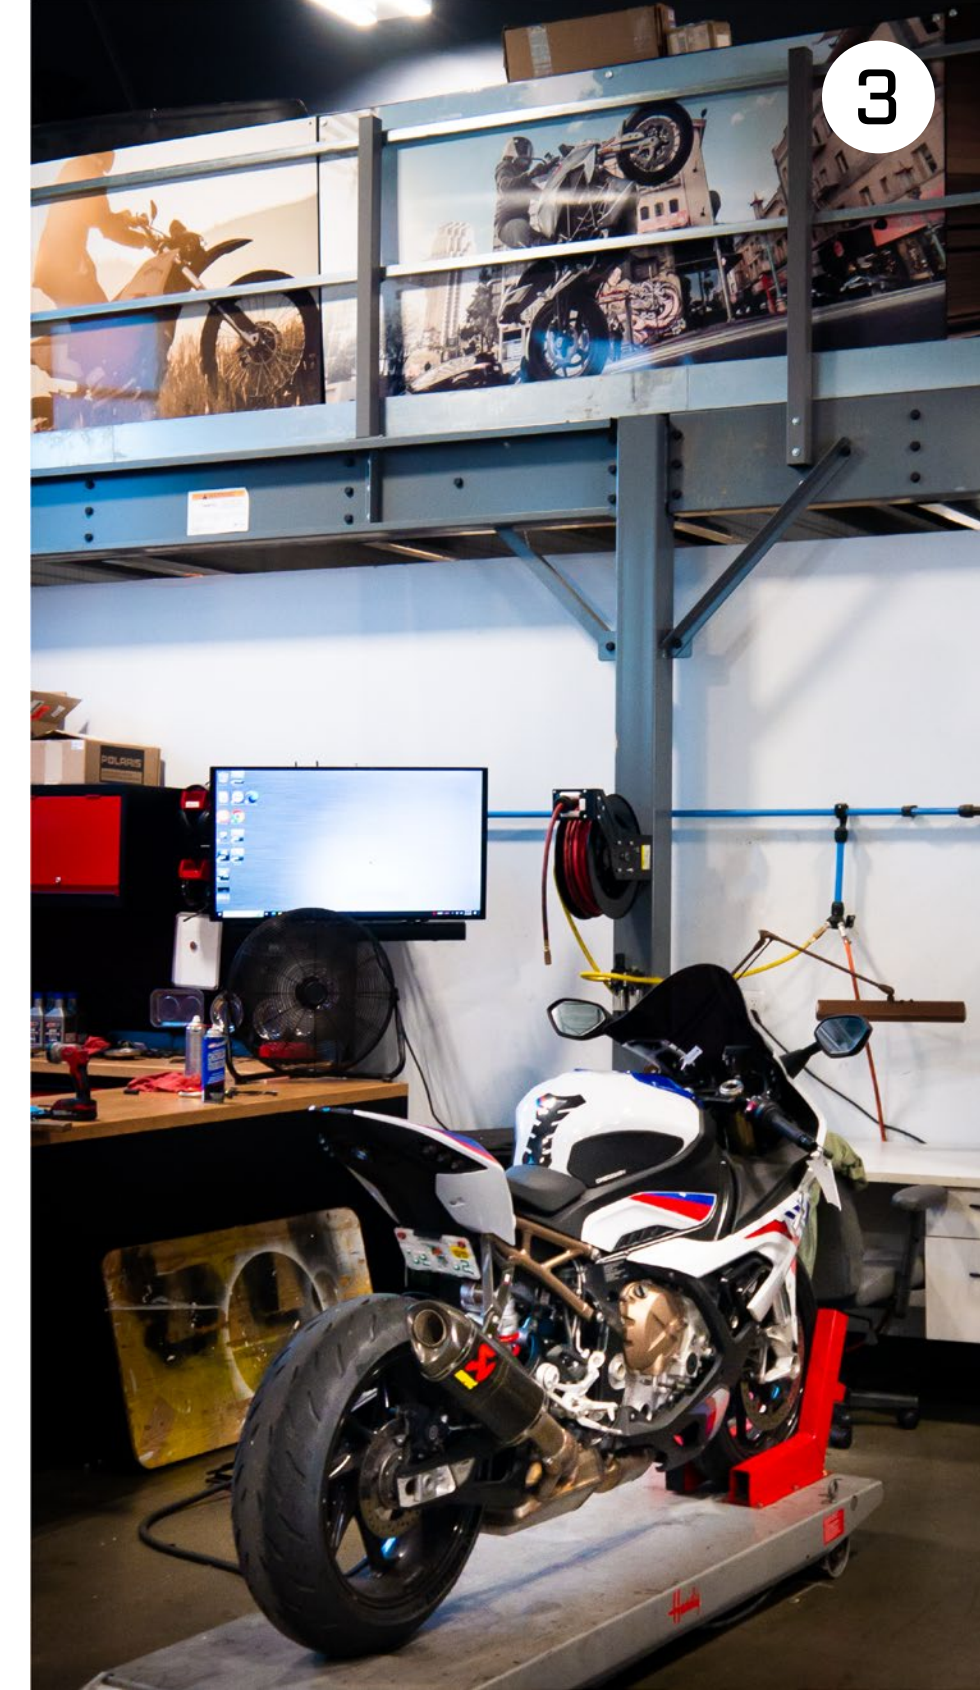

WORKSTATIONS

In addition to the mezzanine, AGF Workstations were installed strategically throughout the service department, dividing it into 8 distinct zones that enable each mechanic to complete their tasks in the most efficient manner possible.

Project Details

A CLOSER LOOK

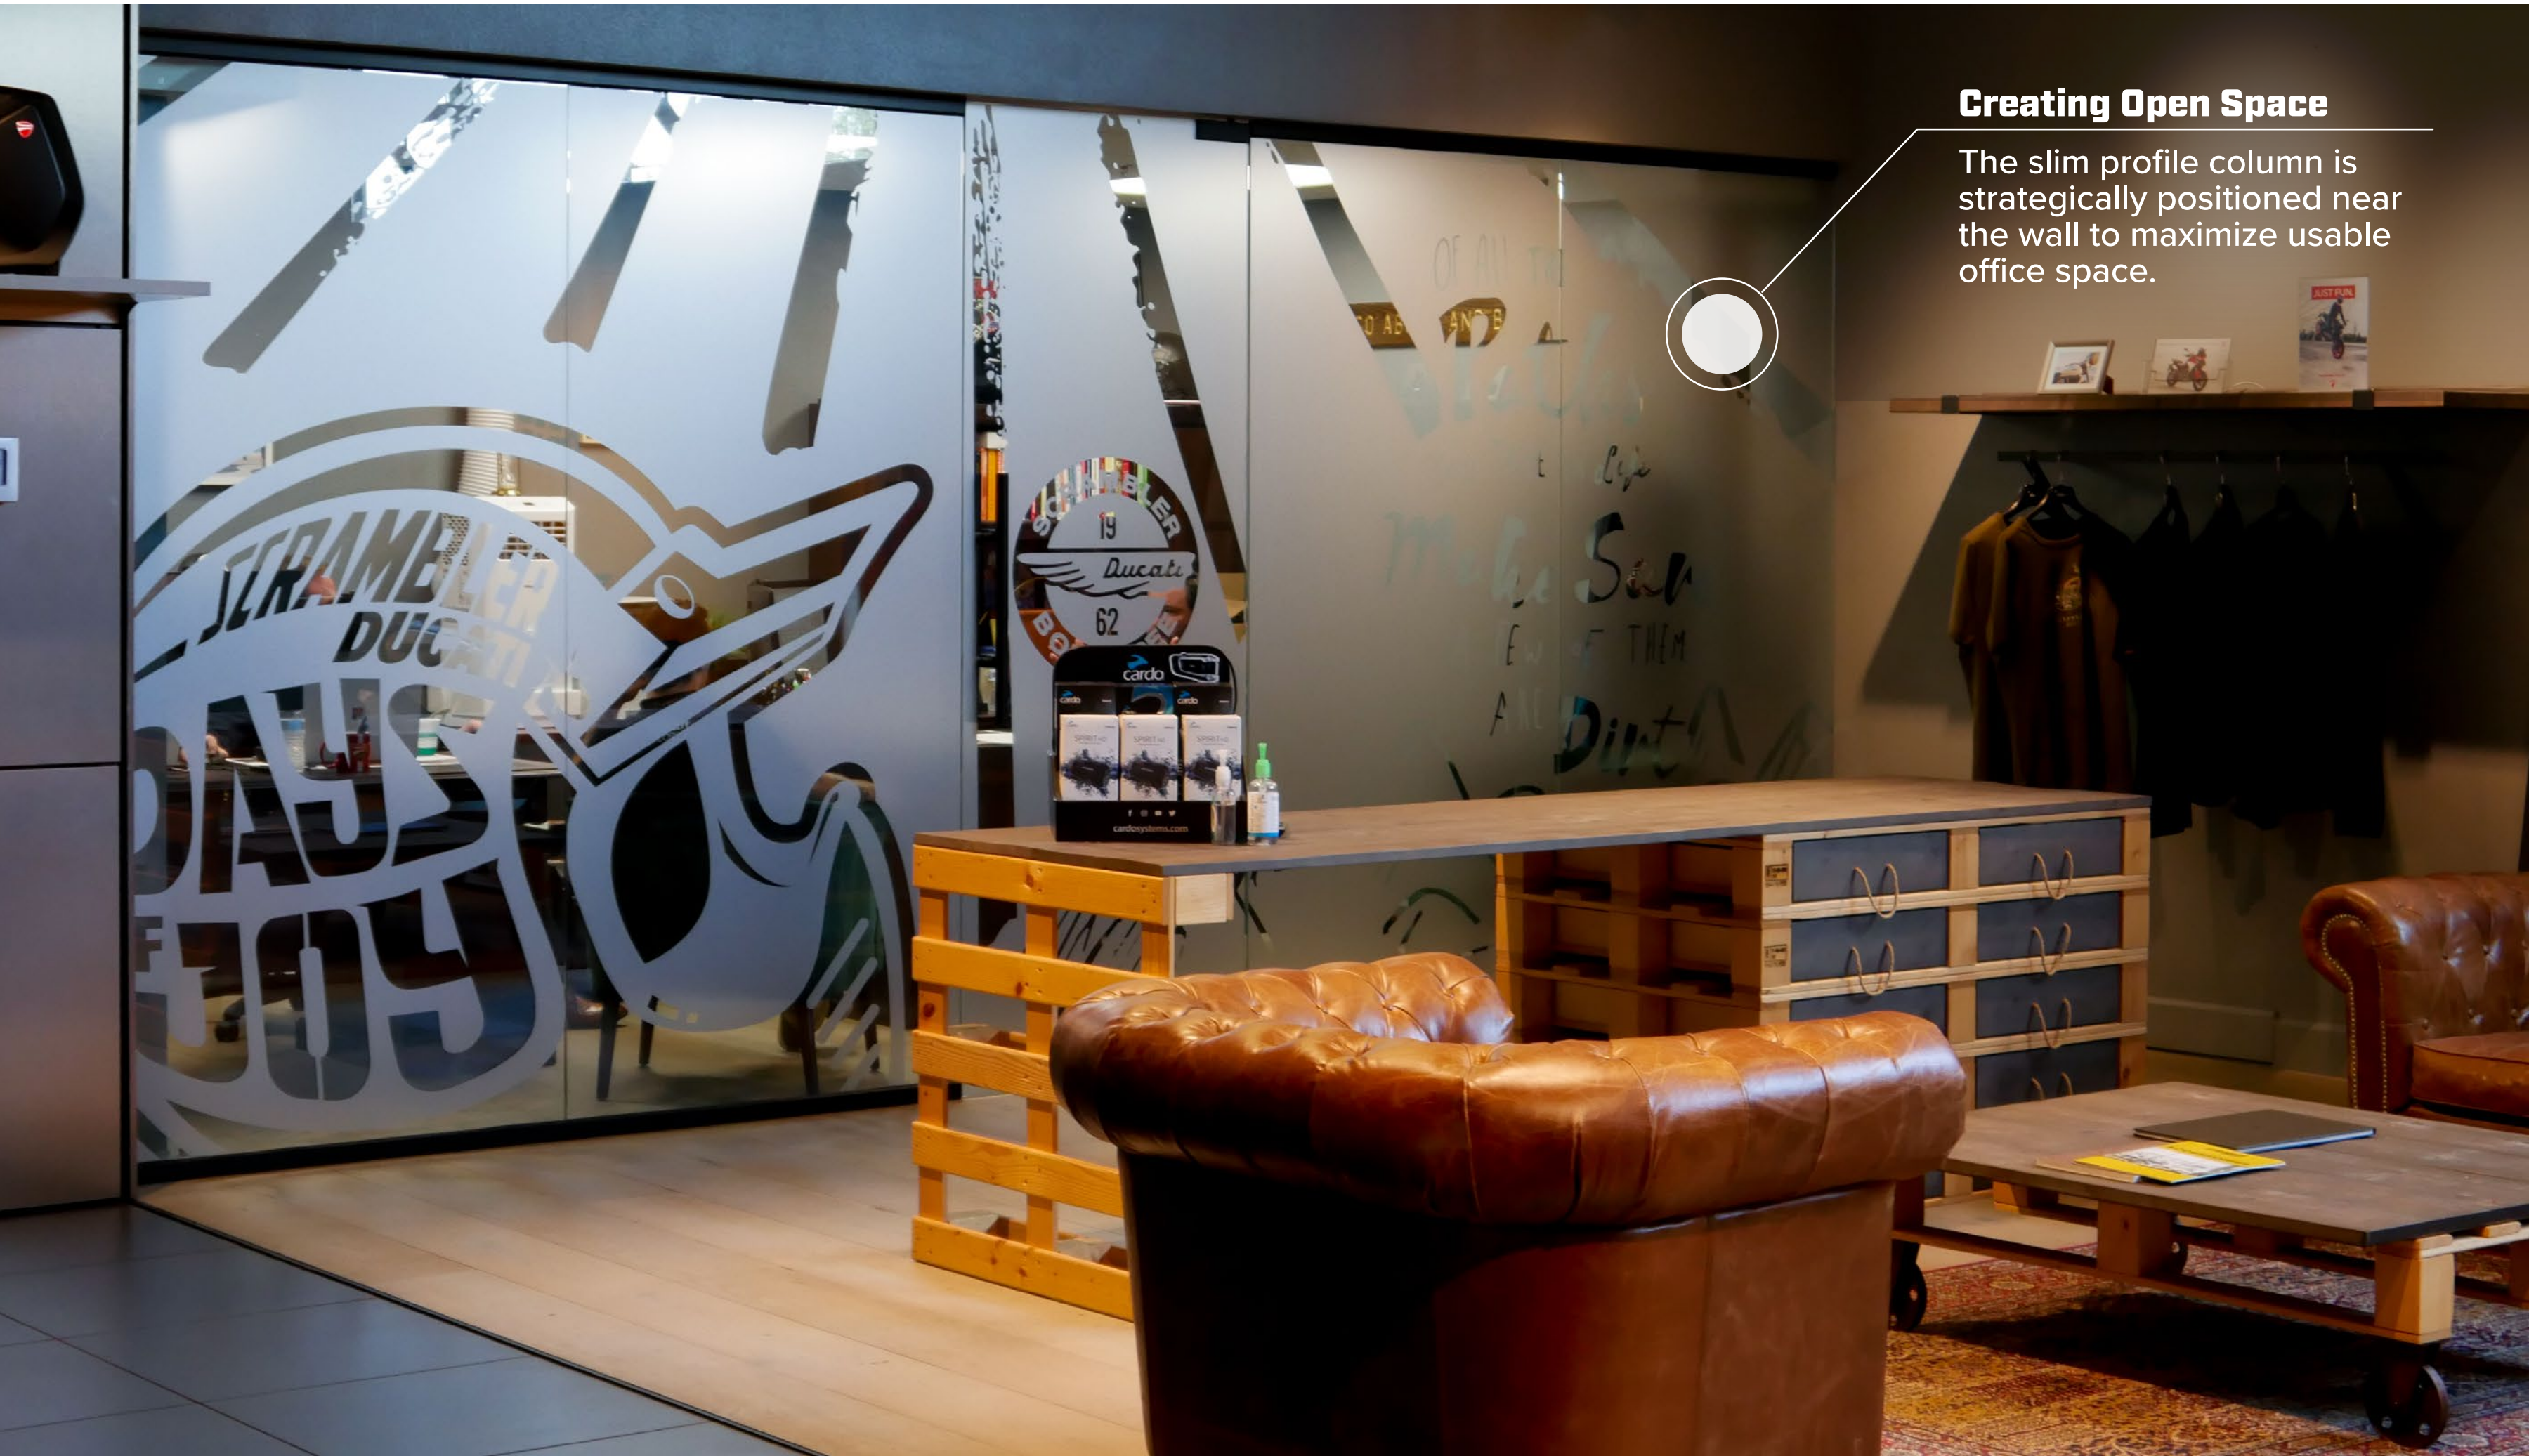

Enhancing the space. In more ways than one.

By investing in a mezzanine, Sky Powersports was able to take advantage of the unused vertical space above three separate departments without impacting operations on the ground level.

In fact, they were able to actually enhance the spaces below the mezzanine by incorporating sleek design elements and practical features such as the service window for their parts department.

- ① Parts Department
- ② Showroom & Offices
- ③ Service Department

Creating Open Space

The slim profile column is strategically positioned near the wall to maximize usable office space.

MEZZANINE FEATURES

This sleek glass-enclosed office located in the Ducati showroom at Sky Powersports sits directly beneath their Cogan mezzanine. This is a great example of how, with the right plan and attention to detail, a mezzanine can blend in seamlessly with its surroundings.

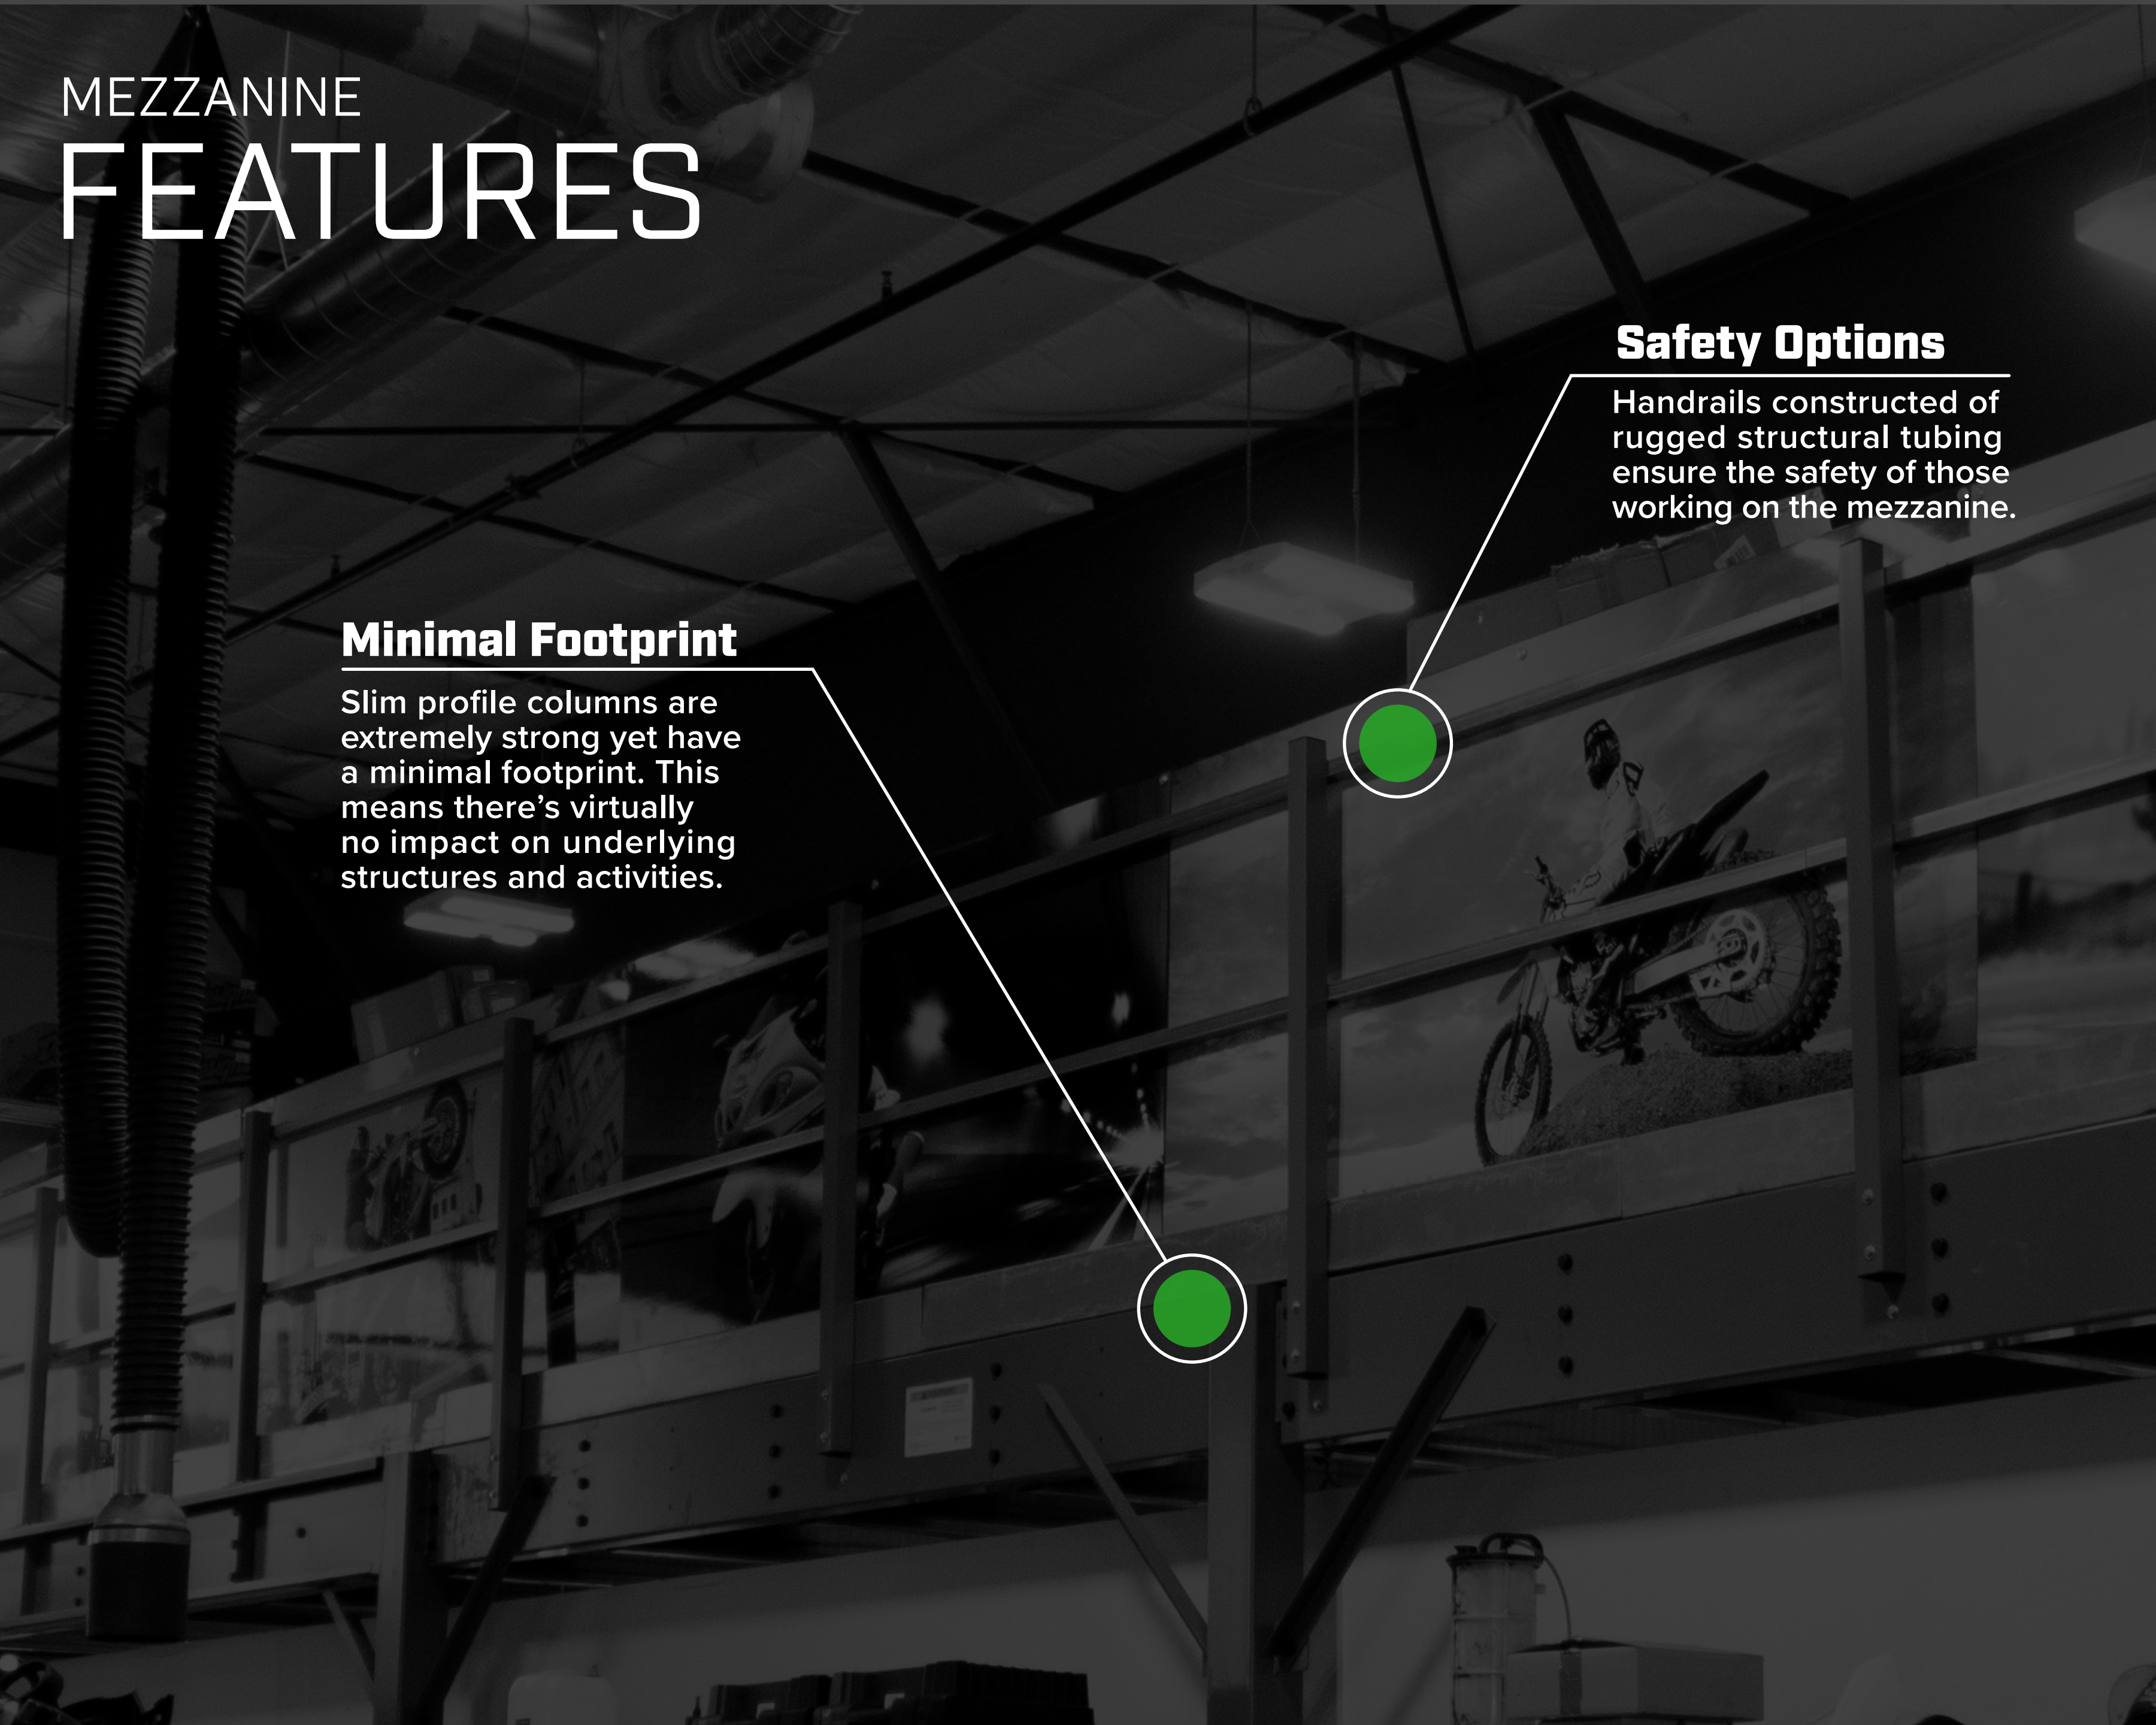

MEZZANINE FEATURES

Minimal Footprint

Slim profile columns are extremely strong yet have a minimal footprint. This means there's virtually no impact on underlying structures and activities.

Safety Options

Handrails constructed of rugged structural tubing ensure the safety of those working on the mezzanine.

AGF BROME

Workstations

The AGF Brome workstations at Sky Powersports were tailor made to their exact specifications, from drawer sizes and cabinet types to countertop material.

Workstation

FEATURES

Countertops constructed of butcher block allow mechanics to repair painted parts and other sensitive equipment without the risk of damage.

SCRAMBLER DUCATI

Benefits of a Mezzanine

AFFORDABLE

Far more economical than renovating, purchasing a building or new construction

FAST

Minimal downtime - can be installed in days rather than months or years

EFFECTIVE

Allows you to quickly double your floor space by taking advantage of the unused vertical space in your building

FLEXIBLE

Can be easily moved, disassembled or expanded to adapt to your future needs

DEPENDABLE

Cogan mezzanines are strong, durable and come with a limited lifetime warranty

EFFICIENT

Shares the same ceiling and floor as your current building, so there's no need for a new HVAC system
